Scannez le code QR pour écouter le chapitre 3 de la bande sonore exclusive de la Voie lactée LEGO® Art.

Escanea el código QR para escuchar el capítulo 3 de la exclusiva banda sonora del set LEGO® Art Galaxia Vía Láctea.

Sagittarius A*

At the center of the Milky Way, 26,000 light-years from Earth, is Sagittarius A* (Sgr A*), a supermassive black hole with a mass of 4 million times that of the Sun. Black holes are collapsed astronomical objects with such intense gravitational pull that not even light can escape once it reaches the event horizon (point of no return).

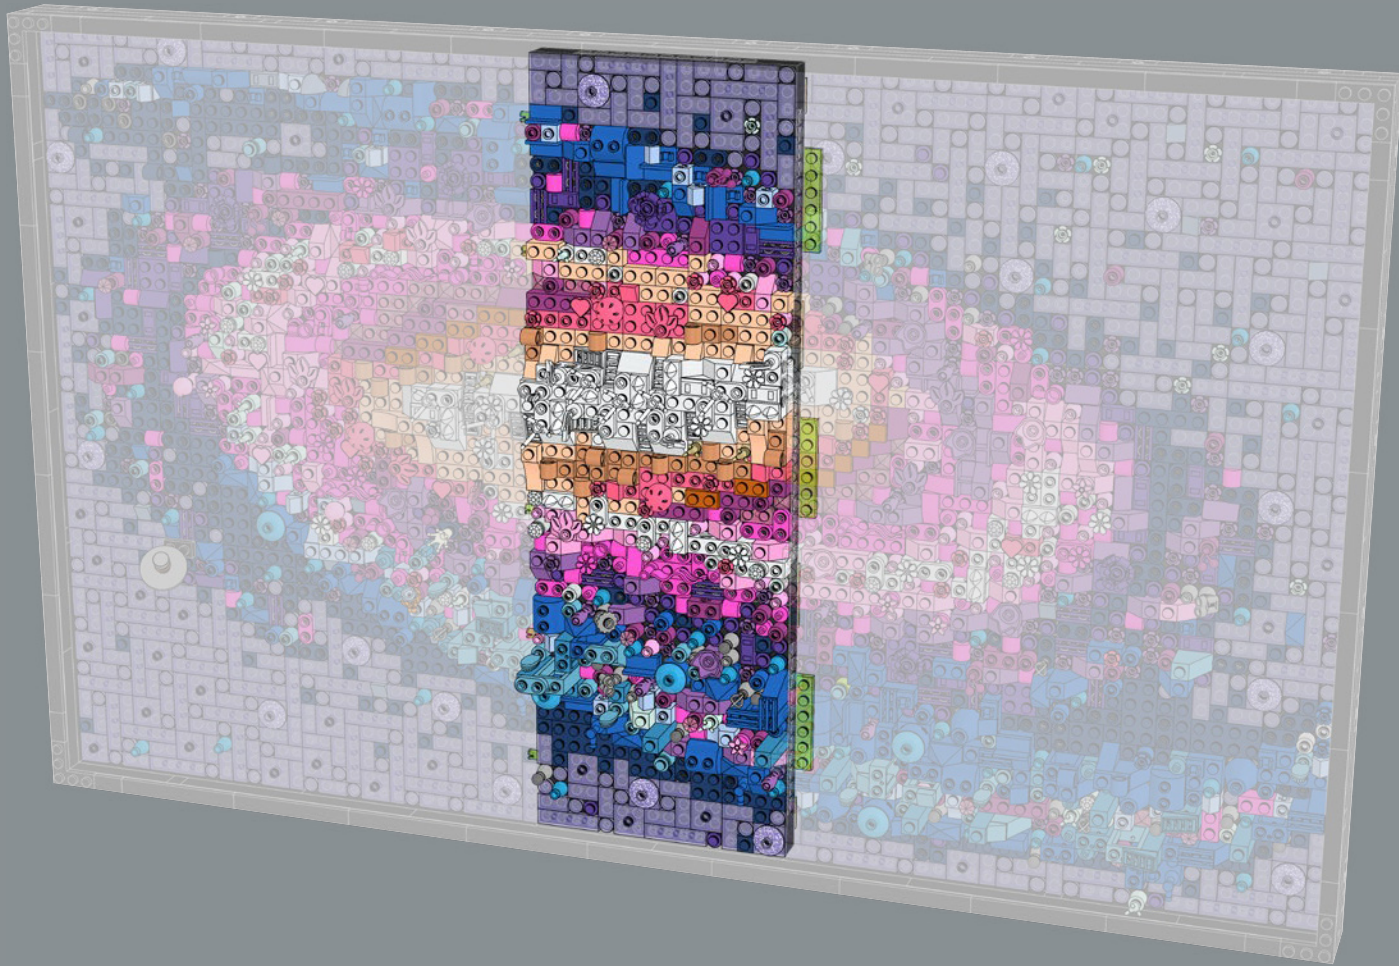

Sagittarius A*

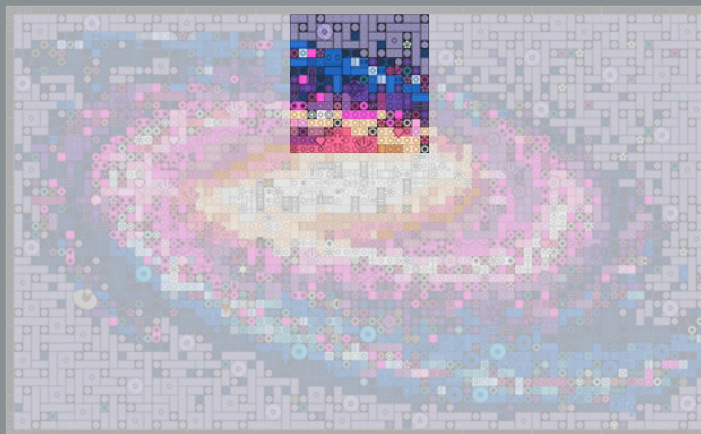

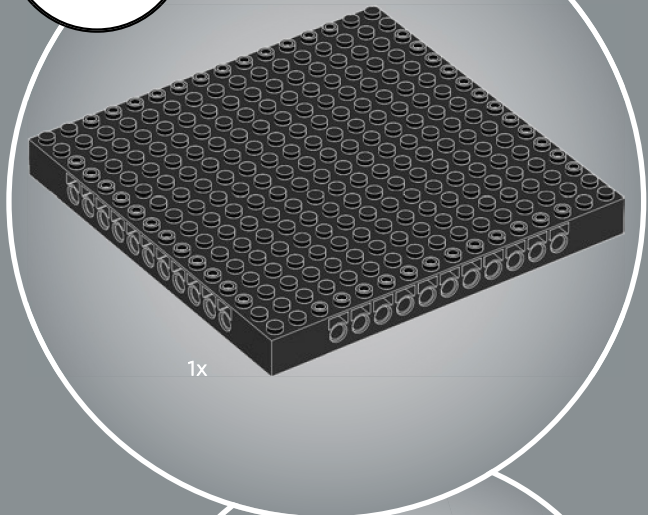

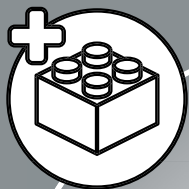

Au centre de la Voie lactée, à 26 000 années-lumière de la Terre, se trouve Sagittarius A* (Sgr A*), un trou noir supermassif d'une masse de 4 millions de fois celle du Soleil. Les trous noirs sont des objets astronomiques effondrés dont l'attraction gravitationnelle est si intense que même la lumière ne peut s'en échapper une fois qu'elle a atteint l'horizon des événements (le point de non-retour).

Sagitario A*

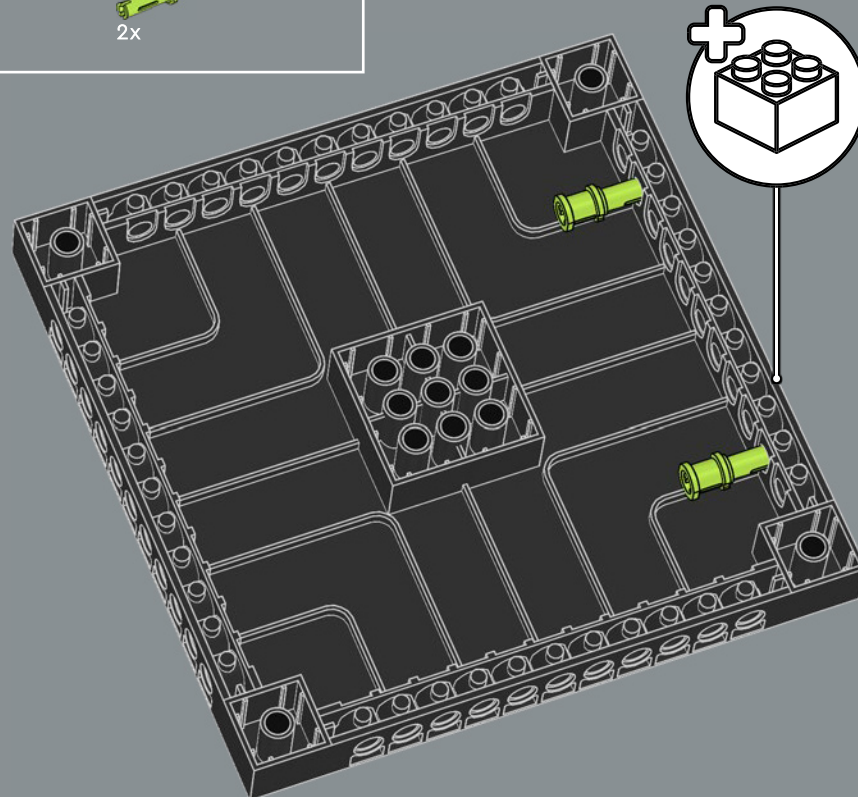

En el centro de la Vía Láctea, a 26.000 años luz de la Tierra, se encuentra Sagitario A* (Sgr A*), un agujero negro supermasivo con una masa de 4 millones de veces la del Sol. Los agujeros negros son objetos astronómicos colapsados con una atracción gravitatoria tan intensa que ni siquiera la luz puede escapar una vez que alcanza el horizonte de eventos (punto de no retorno).
